Midterm Project Proposal

Sarah Kim

Concept & Theme of Site

An interactive site, focusing on remnants of past realties, cultures, societies and figures

intended to emphasize the importance of remembering the past

→ Main page: flippable cards, each having a specific historical topic/ event (front– image/ icon, index n) (back- description)

Subjects may include, but are not limited to…

- Dead or Extinct languages
- Extinct animals
- Significant historical figures/ events
- Historical works of writing and print
  - Propaganda

*still deciding on the categories, either concentrating on one of the categories listed above, or a synthesis of the listed items

→ gallery page, all cards from main page are placed together in a large gallery → each image will fade away upon cursor hover

→ citation page: citation index, covering the sources of each topic (arranged by index number)

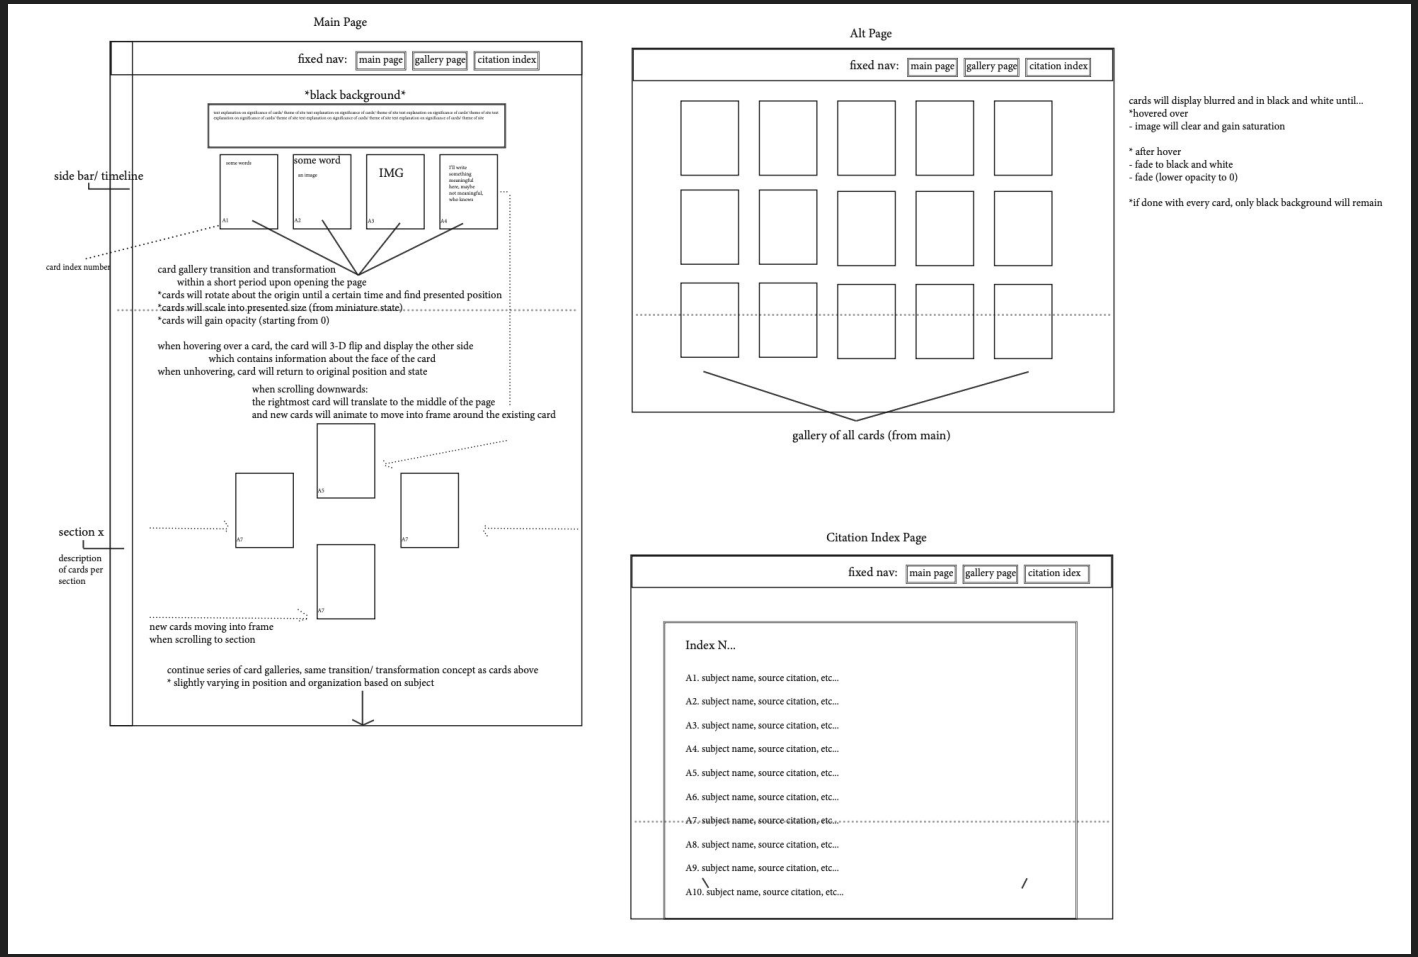
Existing Inspiration

Websites of Inspiration:

- https://abetkaua.com/en/
  - scrolling/ overflow , image translation and 3-D rotation, card–flipping
- https://www.interphygital.nl/sculptures
  - Micro-interactions on mouse hover, alt side navigation
- https://uclab.fh-potsdam.de/arete/en
  - Timeline and organized/ cohesive web layout

Mapping out ideas

The WireFrame



Concepts Covered

- CSS Styles, Properties, and Classes
  - With focuses on transformations and transitions (form and elements of objects & images)
    - Pseudo classes

microinteractions between the user and the web interface

    - Scaling, rotating, skewing, translating, opacity & alpha
    - Image filters and appearance
    - Image Gallery and image manipulation
  - Navigation bar styles
  - Dropdown menu
  - flexbox
  - Importing fonts, Display Type, Z-index (order of components), overflow control

Concepts to Discover

- CSS Properties
  - Scrolling animations
  - inscription on other side of a fully rotated object / image
  - Hover: after
